

WEDNESDAY, JANUARY 8.

YESTERDAY was the day for counting the electoral vote. All the messengers arrived Monday, except the messenger from Florida.

HON. LOUIS FOLK has introduced a bill in Congress granting the Henderson State Line road the privilege of bridging Green river at two points. The bill will pass.

The Pullman Palace Car Company has absorbed the Mann boudoir and the Woodruff companies and now controls the sleeping and palace car privileges over 150,000 miles of railway.

SEVEN colored politicians from Kentucky called on Gen. Hancock last week. He gave them a ten minutes audience, but did not promise that they should be represented in the Cabinet.

The Henderson county grand jury have indicted Cline, superintendent of the bridge construction at Spotsville, for murder, and indicted the assistant, Martin, for destroying the bridge. The whereabouts of neither has yet been learned.

Mrs. FAYETTA C. SNEAD died at her home in Washington last week. She was formerly of Kentucky, and was for a number of years the Washington society correspondent of the *Charleston Journal* and the *Washington Post*. "Fay" was a brilliant woman, and the mother of Miss Austine Snead, Miss Grandy, who died a few months since.

MR. N. B. CHAMBERS, of Haverfield, is the latest candidate in the field to succeed Hunter W. in the District Congress. We do not know him personally, but a friend whose word is wholly reliable, writes us that he is a gentleman in every way capacitated to fill that office, and that he will be a hard man to defeat before the administration.

CONGRESSMAN James N. Burpee, of Missouri, died suddenly in Washington last Friday morning. He was an active member of the appropriation committee, and worked faithfully up to the time of his death. His remains were taken to St. Joseph, Mo., for interment, and will be cared for by a committee of Representatives and Senators. He is one of the few men in Congress whose death will be greatly felt.

The Senate Tariff bill has gone to the House, where it will either be dissected or killed in committee. It was so subject in its making to the great mass of consumers that even Joe Brown, the great Southern protectionist, could not support it; and Voorhees, who has been claimed on the side of protection, not only voted against it, but spoke against it, and against the measure as a piece of inequitable legislation.

The *Forum* for February is exceptionally fine. The year 2893, by Jules Verne, is a masterpiece of imagination and wit. "Are good Women Characterless?" by Mrs. Linton, is terrible in its analysis of woman's power. "The Character and Willingness" by "Shall Negro Magistrates Rule?" are broad in their views of social conditions. There are other excellent productions in this number. In fact, the *Forum* is always good, but the February number is a treasure in itself.

We were shown several papers by H. B. D. McHenry which were sent him by John J. McHenry from Honolulu, Hawaiian Islands. One is printed in Chinese, and is a series of biographies of antiquity. The *Yappa Kookoo* is printed in the native Hawaiian language. The letters are the same as in English, except that twelve letters compose the entire alphabet. One remarkable feature of this paper is that every word ends in a vowel. The Hawaiian *Goaia* and the *Yappa Kookoo* are printed in the English language, and their editors read like their editors were native Americans.

On our fourth page, we published a summary of the work of the Assessor, prepared by Deputy Clerk Coleman. It affords a subject for lesson in statistics and is in a commendable, as well as instructive. We learn from it that in one county, three thousandth valued at \$300, four hundredth with an average value of \$20 and five thousandth valued at an average value of \$19. Holding down a little further, we find that there is \$110 worth of jewelry, \$250 worth of household furniture over \$250, etc., and 4 paintings, and that family likeness valued at the marvelous price of \$3.00. On inspection shows the full sum of \$80 worth of agricultural products such as.

HONOLULU, HAWAIIAN ISLANDS, January 10, 1888.

EDITHA HARRIS: I arrived at this place December 21st, after a three day voyage of seven days from San Francisco. The passage over was the roughest I have ever experienced. On the night of the 21st, a storm arose, blowing away the boats and throwing large quantities of water down the companion ways. Of course I was seasick, and for two days I did not care much whether "the sea" or "the land" was before me. I thought, that "life on the ocean wave" is not what it's cracked up to be. The Sandwich, or more properly the Hawaiian Islands, lie in the torrid zone, and extend from 18 degrees 22 degrees north latitude and are from 134 degrees 10 to 160 degrees west longitude from Greenwich.

There are eight islands inhabited with a population at present of 80,000 people. The islands are quite small, compared to the 40,000 population estimated by Cook when he discovered them. The population of the islands varies from 15,000 to 25,000, and have a total area of 6,484 square miles.

They are of volcanic formation, but are surrounded in most cases with coral reefs. The islands are quite small, compared to the 40,000 population estimated by Cook when he discovered them. The population of the islands varies from 15,000 to 25,000, and have a total area of 6,484 square miles.

A country in which the extremes are 55 degrees and 85 F. and the average 75 degrees. The climate is quite equable. There is no malaria even in the swampy districts, and no local diseases except the one and that is enough to make one for a short of laborious life. This is because of the fact that the islands are surrounded by a high mountain and the sea.

Food and clothing is furnished them by the natives. The islands are quite small, compared to the 40,000 population estimated by Cook when he discovered them. The population of the islands varies from 15,000 to 25,000, and have a total area of 6,484 square miles.

Is the Pacific Ocean on the line from San Francisco to Australia is a great matter. It is the most important of the most important cities in the world. The islands are quite small, compared to the 40,000 population estimated by Cook when he discovered them. The population of the islands varies from 15,000 to 25,000, and have a total area of 6,484 square miles.

UNJUST. The opinion that obtains in some parts of the country that every man in Hartford is a standing candidate for some office, is both absurd and untrue. There are but two Hartford people holding elective office in the county today: C. M. Pennington, County Attorney, and Charles Hardwick, Circuit Clerk. How about the others? T. J. Smith, County Clerk, was elected from the northern part of the county, and County Judge, Mr. Case, came from the town of East Windsor. All of his deputies are from the county. Assessor Parrott lives at Beaver Dam, Corner Cannan at Horton, and Sup. Lewis from Montgomery.

## SUBSCRIBERS, READ THIS.

We give the following United States Post Office law as it stands relating to newspapers and subscribers:

1. Subscribers who do not give express notice to the contrary are held to be subscribers for the full term of one year, unless they give notice to the contrary.

2. If subscribers order the discontinuance of their periodicals, the publisher may not continue to send them until after express notice is given.

3. If subscribers neglect or refuse to take their periodicals from the office to which they are directed, they are held responsible until they have notified their publisher, and are then discontinued.

4. If subscribers move to another place without informing the publisher, and the papers are sent to their former direction they are held responsible.

5. Any person who receives a newspaper and makes use of it, whether he has ordered it or not, is held to be a subscriber.

6. If subscribers pay in advance, they cannot give notice to the publisher at the end of their term, if they do not wish to continue taking it, otherwise the publisher is authorized to send it, and the subscriber will be responsible until express notice with payment of all arrears is received by the publisher.

## OBITUARIES.

Beginning with the year, the Herald will print obituary notices of the deceased free of charge. All over the world will be charged at the rate of one cent per word, and no other charge will be made.

## EDUCATIONAL.

By E. W. Elrod—Editor for the Third District S. T. A.

If writers upon the subject of education could reach the masses and impress upon them the importance of the question of the hour, how is it that education leads to national wealth, how the intelligent man becomes a better and more useful citizen, and why the more school houses and better schools there are, the more the nation prospers, the fewer crimes and less use for jails, then, indeed, would the future outlook be more encouraging than it is. It is very much like the preacher who occasionally chiding his absent members to those who are present in their attendance. We must reach the masses through other instrumentalities. Every intelligent man and woman ought to consider himself and herself as a special agent to urge upon their less intelligent and indifferent neighbors the importance of having their children take advantage of every opportunity afforded them of having their minds cultivated and their mental faculties developed. Right here I want to assert most emphatically that I am a friend to the public schools, although not connected with the system. I have found from long experience that our public schools and the higher education are better patronized from districts where they have the very best public schools.

So if I have an axe to grind, it will be better given to giving our public schools improved. What we need is greater zeal and a more wide-spread interest on the part of the friends of education; a willingness on the part of every citizen to supplement the State; that better salaries and consequently better teachers can be employed; to provide better and more comfortable school houses; to see that they are properly supplemented with all the appliances necessary for the advanced education of the pupils. The school room environment of the pupils is a factor in his educational development of more than ordinary importance. Nothing, perhaps, of the highest good of teachers—contributes more to the success of school work than well planned and suitably located school buildings. The proper heating, lighting and ventilating, as well as the beautiful, healthy, and cheerful surroundings, must have the requisite attention before the high results can be expected. Our public school system will never be what it should be until a good common school, well equipped and well taught for at least eight months of the year, is located within the reach of every family and from which every boy and girl of promise and ambition may receive the benefit through the high schools and colleges of the departments of our universities.

In brief, every child in the State should have the opportunity and encouragement to make the most of himself, to attain the highest degree of intellectual and mechanical, of which he is capable, and therefore his highest usefulness.

## CONNECTION NEARLY CURED.

Two years ago, I was informed by a friend that I have a positive remedy for the above named disease. By its timely use, thousands of helpless cases have been permanently cured. I shall be glad to send two bottles of my remedy free to any reader who has been afflicted with it, and will send further advice and offer advice.

Respectfully,  
T. S. MONTANA, M. D.,  
415

## A Sound Legal Opinion.

E. Mainbridge, Monday Eve, County City, Nev., says: "I have used Electric Bitters with most happy results. My brother who was very low with Mal de Pape and Jaundice, but was cured by timely use of this medicine. An afflicted Electric Bitters saved his life."

Mr. D. L. Wilkinson, of Howe, Kan., adds a like testimony, saying: "He positively believes he would have died, had it not been for Electric Bitters."

This great remedy will cure, as well as cure all Malarial Disease, and all Kidney, Liver and Stomach Disorders, states, unqualified. Price 50c and \$1. At Wayne Griffin & Bro's Drug Store.

This Hacking Cough can be quickly cured by Shiloh's Cough Cure. It is sold by J. W. Ford.

A FREE and easy expectation is produced by a few doses of Dr. J. H. McLean's Kidney Pills. It is a safe and easy cure of all cases of leucorrhea, or those of difficult discharge.

For backache, neuralgia, or chest, use Shiloh's Kidney Pills. Price 50c and \$1. For sale by J. W. Ford.

# COUNTY STATISTICS.

The Following Statistics as Shown by the Balance Sheet of the Assessor's Book for 1890 Were Prepared for the Herald by Mr. John P. Coleman, Deputy County Clerk

	NO. VALUABLE.	NO. VALUABLE.
